After responder's second bid jump shift shows a splinter with support for last bid suit.

1.2.3 Waiting 2.

In non-fit auctions 2© implies a hand that has no side 5-card suit, no great 7-card suit, and no great support for partner's minor.

Example:

```
1♣—1♥—2♦—2♥—

2♠ 4+♠(shorter than ♦), denies 3+♥

2⊙ waiting, may have 4♣, denies 3+♥

3♠ 5+♦5+♠, denies 3+♥

3♦ 7+♦ (or 6 very good ones), denies 3+♥

3♥ flag, hearts is trump

3♠/4♣ splinter for hearts

4♥ very bad raise
```

1.2.4 The Implied Cue-bid

Before a fit is agreed, bidding a suit that is unreasonable as a possible trump suit at the level of $3 \diamondsuit$ or higher implies a fit with partner's last bid suit. This is known as an "Implied Cue-bid".

The logic is: you need at least two ways to raise partner to show the difference between a bad or good hand for the auction to date.

1.3.8 Interference over 1♦

Negative doubles are used. 2-level free bids ($2 \diamondsuit$ is a free bid) are F1. After 1 of a major overcall, a jump in clubs still shows both minors. Support (re)doubles are on.

As a responder assume that opener has 10–13 BAL until told otherwise.

1.12 Conventions common for multiple opening bids

Not used after $1 \clubsuit$ opening. It is on in some competitive situations (not if opponents bid after Z).

1.13 Slam Bidding

1.13.1 Kickback Roman Keycard Blackwood

Without Kickback (keycards are Aces and trump K):

```
4 ○ RKC

5 ◆ 1/4 keycards

5 ◆ 0/3 keycards

5 ◆ 2 keycard, no trump Q

5 ◆ 2 keycard, trump Q
```

With Kickback (X is trump):

```
4X + 1 KRCK

4X + 2 1/4 keycards

4X + 3 0/3 keycards

4X + 4 2 keycard, no trump Q

4X + 5 2 keycard, trump Q
```

Next step queries trump queen (if not known):

```
Y trump Q ask Y+1 no trump Q Y+2 trump Q
```

Next step queries #kings (then #queens, ...):

```
Z #kings ask

Z+1 0/3 kings

Z+2 1/4 kings

Z+3 2 kings
```

1.13.2 Is it Kickback?

The answer is that if a 4-level jump bid could be construed as Kickback, and there is any way to bid that suit naturally and forcing below game, then it is Kickback.

If there are two suits, then the cheapest "impossible" bid is Kickback for the lower suit and the next "impossible" bis is Kickback for the higher suit.

1.13.3 Preemptive Roman Keycard Blackwood

Over our preempts $(2 \checkmark \spadesuit, 3 \checkmark \lor \spadesuit)$ 4 asks (over 3 \spadesuit , 4 \spadesuit asks), then

 S_1 0 keycards

 S_2 1 keycard, no trump queen

 S_3 1 keycard, with trump queen

 S_4 2 keycards, no trump queen

 S_5 2 keycards, with trump queen

1.13.4 Serious 3NT and Last Train

When a major suit is trumps and slam is not yet ruled out, 3NT is not natural, but rather a waiting bid that shows a good hand in context. If you bybass 3NT, you deny a good hand in context.

The bid one under 4 of the major also shows a good hand in context, and nothing about the cue-bid suit.

Example:

```
1♥—2♣—2♥—3♥—
```

- 3♠ cue-bid, does not say whether serious or not
- 3 \odot Serious 3NT (13–15 as 1 \forall was 10–15), denies a spade cue
- 4♣ cue-bid, non-serious hand (10–12), denies a space cue, min but not the pits
- 4♦ Last Train, non-serious hand (10–12), no spade or club cue
- 4♥ the worst hand (10-11), bad distribution, honor location and slam cards
